SUMMARY

MCA student with experience in software development, full-stack web applications, and AI-powered solutions. Skilled in Python, Java, ReactJS, SQL, REST APIs, and object-oriented design principles. Experienced in building scalable applications, collaborating within development teams, and leveraging modern technologies to solve complex problems. Passionate about cloud computing, AI tools, and software engineering best practices.

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, SQL

Frontend: HTML5, CSS3, JavaScript, ReactJS

Backend: Django, Flask, REST APIs, API Development

Databases: MySQL

Tools: Git, GitHub, VS Code

Concepts: Object-Oriented Programming (OOPS), Data Structures & Algorithms, DBMS, Software Development, System Design

EDUCATION

Master of Computer Applications (CGPA: 9.04)

2024 – 2026

Sister Nivedita University, Kolkata

Bachelors of Science in Physics (CGPA: 8.247)

2020 – 2023

University of Calcutta, Kolkata

EXPERIENCE

Python Developer Intern | Infosys Springboard

Sep 2025 – Nov 2025

- Developed backend modules and workflow-driven applications using Python and Django.
- Designed and integrated REST APIs for efficient communication between application components.
- Implemented authentication, secure data handling, and role-based access control mechanisms.
- Optimized MySQL database operations and improved application performance.
- Collaborated using Git and participated in debugging, testing, documentation, and feature development.

PROJECTS

ClearText AI – AI-Powered Plagiarism Detection System

[GitHub](#)

HTML, Tailwind CSS, JavaScript, Flask, LanguageTool, T5 Transformer, MiniLM, TF-IDF, Cosine Similarity, Reportlab

- Developed an NLP-based plagiarism detection platform using Sentence-BERT and Flask.
- Integrated grammar correction, paraphrasing, and semantic similarity analysis modules with automated report generation.
- Built modular architecture supporting scalable AI-driven text analysis.

PetConnect – Pet Rescue Web Application

[GitHub](#)

HTML, CSS, JavaScript, Python, Django, APIs, Git, MySQL

- Developed a full-stack web application using Django, MySQL, HTML, CSS, JavaScript, and ReactJS.
- Designed responsive user interfaces and RESTful backend services.
- Implemented secure adoption and rescue management workflows.

Weather Data Analysis Application

[GitHub](#)

HTML, CSS, Javascript, API

- Retrieved real-time weather data using APIs and Python.
- Performed data transformation and analysis of temperature, humidity, and wind speed trends.
- Built visualizations and automated reporting workflows.
